

Where Did My Day Go?

Learning a new skill, or enhancing an existing one, is made much more enjoyable and impactful through the timeless format of story telling. Where Did My day Go? is the second in an exiting new series of books, which tell the story of a leader Quinn Spencer who is learning the essential skills of leadership the hard way - on the job! Within this book you will see Quinn, after the first month in the role of Divisional Manager, struggling with the volume of work needed to both manage the day-to-day activities whilst simultaneously lead the team in their many projects and tasks. Quinn discovers time management is as much about self-management as it is about project management. In addition, without the ability to be able to bring singular focus to the most important tasks and objectives, life can quickly spiral out of control into a cluttered and disorganized mess! With the help of the vice-president and a fellow divisional manager Quinn attempts to find that all-important focus through a combination of technology, processes and systems and the development of effective habits.
