Four years ago, Kate Parker was Katy Warren. Wife to Hollywood's newest star, Liam Warren, she thought her marriage would stay the same when she and her new husband moved to L.A., but she was wrong. One night after a particularly crazy party, she threatened to leave if Liam could no longer be the man she married. Unfortunately, he didn't believe her until she was gone. Katy left Liam and Hollywood behind, disappearing without a trace, but couldn't bring herself to ever officially end their marriage. Now, Katy is just Kate. She's living in college dorms with her best friend Krista, working towards a psychology degree. As far as she's concerned, Liam is out of sight and out of mind. That is, until he shows up on campus while he's in town filming his latest movie. Sparks fly, both good and bad, and Katy has to decide if she can handle Liam and his world again... and more importantly, if she can trust him with her heart again.
